DETAILED ACTION

Election/Restriction

1. A further review of the application indicates that the claims contain two different and distinct inventions and a restriction should be required. Such requirement of the restriction may be made at any time before Final action in the case at the discretion of the Examiner. See 37 CFR 1.142(a) & MPEP 811. The restriction of this application delays in the prosecution written.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a method for detecting a boundary between sequences, classified in class 375, subclass 343.
- II. Claims 23-28, drawn to a method for providing an enhanced operating mode for a plurality of communication devices in a communications system, classified in class 375, subclass 242.

2. The inventions are distinct, each from the other because:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility such as a method for detecting a boundary between sequences (Group I); and a method for providing an enhanced operating mode for a plurality of communication devices in a communications system (Group II), See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have required a separate status in the art as shown by their different classification and by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
